Descrizione

The Epson PP-100AP Autoprinter delivers professional prints on CDs, DVDs or BDs. The PP-100AP processes up to 95 discs per hour and is therefore ideally suited for quick and efficient large batch production of professionally designed digital media. The new Discproducer™ delivers high-quality printing while keeping costs low.

CDs, DVDs, and Blu-ray discs are frequently used in the entertainment and imaging industries but there also is an increasing need for businesses, agencies and public organizations, who need discs with a professional look and finish for their digital handouts. Today, marketing departments prefer sending images and movies on CDs and DVDs to customers and partners.

The fully automatic Autoprinter has four trays, allowing up to 100 discs in two trays to be processed continuously in one print run. It combines superb print quality and convincing speed. The Epson PP-100AP processes up to 95 discs per hour in a fast printing mode, and 50 discs in photo quality mode. If you need to print higher volumes for example, when duplicating discs professionally-the system can be scaled to match your requirements: you can control up to six Epson PP-100 AP Autoprinters from one computer and process up to 570 fully printed discs (45 mm - 116 mm) per hour.

The sealed printing system is protected against dust and relies on the built-in AcuGrip™ mechanism designed for a long lifespan of over 100,000 printed media. This way, it even meets the challenging needs of professional disc producers. Using six high capacity individual ink cartridges the PP-100AP achieves an incredible print capacity of over 1,000 prints per set of ink cartridges. To help you work more efficiently it comes with the intuitive software Epson Total Discmaker.
