Beschrijving

The new EPSON Discproducer PP- 100II Kiosk Mode, a production system for the fully automated burn and print CD / DVD media. The Kiosk Mode Version conveniently ejects completed CD copies onto a front tray

The Discproducer PP- 100II from Epson is a DVD and CD Disc Publisher class and combines proven features with new advancements.

The Discproducer used to archive the most accurate, most reliable CD - DVD drives on the market from the Pioneer PR1 series. And with the USB 3.0 SuperSpeed interface, it can burn up to 30 CDs or 15 DVDs in one hour and full-surface printing.

The powerful PP- 100II burns up to 100 discs or more than 4 terabytes of data in a single pass. The device is protected from dust and fully automatically in order to ensure a reliable and safe operation. Its patented AcuGrip robotic arm ensures that only one disc is recorded, so that production runs can run unattended.

The maintenance cartridge and the CD-/DVD-drives can be replaced by the user, whereby the PP- 100II assuring a long life of over 70,000 discs and long-term cost benefits.

The Discproducer also saves space with their compact size and is stackable, what with large production needs is a valuable benefit especially for businesses.

The software Total Disc Maker 5.0 is included. It offers high-performance, advanced features such as the readback Tool to Find a file with a complete stack is searched from 50 discs. By merging feature is the pressure also individual database content is printed on each disc surface and simplifies the batch production.

Optical discs are a long-term reliable storage medium and keep magnetic fields, water, humidity and dust stood. They offer the peace of mind that the data is secure. And they are future-friendly, as even the latest drives can still read the very first CDs.

A special feature of this device is the individual ink cartridges which make the system significantly stands out from its competitors. Compared to previous systems, the inks are actually here to 100 % depleted. Thus, this system achieved the lowest cost per disc for devices in its class. Combined with the patented Water Shield media you do with it from your CDs and DVDs produced a real eye-catcher and can the created

media Ideal use for marketing purposes. By the LED indicator on the front the levels can be easily monitored.
